Dear Parents,

Please come and see the crops that the students have planted as part of the 4-H partnership. Also, several of the students are participating in a Robotics stem project sponsored by United Way. We also have both boy scout and girl scout troops and finally also partnering through the 4-H, we have a Creature Feature based curriculum that teaches the students about the plants, animals, and other living creatures native to Florida. As you can see, along with the other clubs, remediations, and PBL activities, the students are quite busy learning and exploring. Please check our Upcoming Events and join us for the Family Stem Workshop on November 13th.

As always! Thank you for your support!

Live so that when your children think of fairness, caring & integrity, they think of you. —H. Jackson Brown Jr.
