Dear Parents,

Hope everyone had a thankful Thanksgiving. Even though December is a short school month, we have lots of things to accomplish. They will continue to learn about the “Medical City” by creating a Healthy Living and Healthy Choices. Some of their Learning through Art will be, What is a Chemist? They will learn the job of a chemist and experiment with a new technique using table salt. Also, in art they will create a Hungry Caterpillar, while learning the importance of eating fruits and vegetables. While learning through Wellness, they’ll be playing Body Bingo, as they learn different parts of the body and while their outside, they’ll play Band-aid Tag. Lots of fun while learning.

Remember, there is no school Dec. 23rd – Jan. 7th, 2020 Students will return on Wednesday, Jan. 8, 2020

HAVE A WONDERFUL HOLIDAY BREAK AND A SAFE NEW YEAR

Brevard After School Website

Don’t forget to go to the Brevard After School 21st CCLC website to get the latest information including newsletters, pictures of students completing challenges, workshop schedules and information, and updates from the Semi-Annual Advisory Board Meetings.

Upcoming Events

NO SCHOOL
12/23/19 – 01/0

What you can do to promote early learning

1. Play with your child and provide opportunities for them to play. Play is essential for healthy brain development.
2. Turn off the TV. A young child’s brain is largely shaped by his/her development. Children need activities that stimulate the frontal lobe by involving all the senses, not just passive viewing.
3. Read and talk to your child. Phonemic awareness of sound comes from listening to the human voice.
4. Model the joy of learning and discovery. Go to parks, the beach, zoos and take children on walks. These types of activities stimulate early learning.
5. Connect with your child. Connections boost children’s brain potential, encourages cooperation, promotes learning and literacy, increases attention, decreases power struggles and builds loving bonds.
