We are all like a snowflake in our own different way.
-Unknown

Dear Parents,

We will be working on Badges about Healthy Living, Healthy Choices and Wellness Works. The students will be engaged in several activities such as: What is a Chemist, a Biologist, and your DNA. They will discuss healthy hearts, proteins, fats, and Carbs.

We have our next Parent Night on December 10th, at 5:15 PM in Building 14 Room 105. These meetings are a requirement for the free Grant Program. Please try to attend this one. The subject is Steps to a Positive Bedtime.

Brevard After School Website

Don’t forget to go to the Brevard After School 21st CCLC website to get the latest information including newsletters, pictures of students completing challenges, workshop schedules and information, and updates from the Semi-Annual Advisory Board Meetings.

Upcoming Events

December 10, 2019
Parent Workshop
Building 14 Room 105
5:30-6:00

Winter Break
December 23-January 7, 2020

What you can do to promote early learning

1. Play with your child and provide opportunities for them to play. Play is essential for healthy brain development.
2. Turn off the TV. A young child’s brain is largely shaped by his/her development. Children need activities that stimulate the frontal lobe by involving all the senses, not just passive viewing.
3. Read and talk to your child. Phonemic awareness of sound comes from listening to the human voice.
4. Model the joy of learning and discovery. Go to parks, the beach, zoos and take children on walks. These types of activities stimulate early learning.
5. Connect with your child. Connections boost children’s brain potential, encourages cooperation, promotes learning and literacy, increases attention, decreases power struggles and builds loving bonds.
