Dear Parents,

We are continuing along with our world travels this month. Along with our world travels most of you have seen some of our vegetables from our garden. The children are enjoying the process of planting and watching the plants grow from seed to the strong plants they have become to produce the vegetables they have been able to pick and eat. As we have moved along more and more children want to join our garden club which is awesome. We love giving the children the hands-on experience.

We hope you are enjoying hearing about these adventures as we move along our travel path.

Reminder to all that we participate in outside wellness daily and to go along with school policy closed toe shoes are safest for children’s feet.

Daily attendance is requested and daily check out time is between 5:47pm and 6:00pm.

Education is a gift that no one can take away.
