Dear Parents,

We are in to our new curriculum called Inquiring Minds. We have been doing many fun Science activities.

We will be having the Afterschool Field Day on December 14th. The first attempt of our field day was rained out so... let's hope for no rain and that it is not too cold that day.

Brevard After School Website

Don't forget to go to the Brevard After School 21st CCLC website to get the latest information including newsletters, pictures of students completing challenges, workshop schedules and information, and updates from the Semi-Annual Advisory Board Meetings.

We are all like a snowflake in our own different way.

Upcoming Events

December 14th Afterschool Field Day

December 19-21 Early Release Days

December 21st Last Day before Winter Break

January 10th Students Return

What you can do to promote early learning

1. Play with your child and provide opportunities for them to play. Play is essential for healthy brain development.
2. Turn off the TV. A young child's brain is largely shaped by his/her development. Children need activities that stimulate the frontal lobe by involving all the senses, not just passive viewing.
3. Read and talk to your child. Phonemic awareness of sound comes from listening to the human voice.
4. Model the joy of learning and discovery. Go to parks, the beach, zoos and take children on walks. These types of activities stimulate early learning.
5. Connect with your child. Connections boost children's brain potential, encourages cooperation, promotes learning and literacy, increases attention, decreases power struggles and builds loving bonds.
