Dear Parents,

I am so excited and overjoyed to be a part of this amazing aftercare program. I have over 15 years of Childcare experience that I'm bringing to the table. Our focus this month is getting back in the flow of the Grant program. We will be finishing up learning about Sea Creatures and start on Insect life. My objective is making our students think more about the world around and understand every function. Let's get this year started and explore and learn. Please let's try to make it to Parent Orientation September 11, 2019 so I can answer any questions you may have about the grant Program

Thanks,

Tangela Wilson

Attendance in BASA:

The BAS Academy Program is an academic based program which requires the students to be attending each day checking out no earlier than 5:47 PM. We want every student to get the maximum benefits from the program. If your child is continuously absent, picked up early, or picked up late, they may be asked to leave the program.

If your child is absent or not attending on a specific day, please let us know. This is for the safety of your child.

Parent Orientation Open House

Three reasons every father should read to their child and not just moms:

1. **Dads provide a different set of skills to their children.** When mom and dad read to their children, it positively impacts their learning. When fathers read to their children, the child's verbal skills can increase by up to fifteen percent, which does not typically happen when just moms read to them.
2. **Children are better behaved.** Studies show that when fathers read to their children and share other caregiving responsibilities with mom, their children have better attachment, they have high self-esteem, and show better social competence. The time fathers spend with their children builds their literacy skills, the child has better impulse control, shows a greater ability to take initiative, and are more empathetic.
3. **Children do better academically.** When dads model the importance of literacy to their children, they perform better in academic endeavors, and have higher scores on standardized achievement tests.
